

# **Attention**

- The seam in your new countertop has been sealed with a high quality, water resistant adhesive and sealed with a clear silicone. However, since this countertop is a wood product it remains susceptible to moisture damage. Please ensure that ANY liquid spills are wiped from joints with a dry cloth IMMEDIATELY. Water damage is NOT covered by warranty from our supplier.
- The #1 issue with seams and water damage is the coffee percolator. This is a high moisture appliance and should be used with caution on any seam. Although the seam is sealed, the adhesive can wear down with excessive water or steam, and cause the wood to swell and the laminate to bubble or chip.
- This laminate countertop is a plastic product so you should NEVER cut directly on the surface. Also, use caution when dragging items across the surface. This will result in scratches and there is NO way to repair it.
- When cleaning your new countertop you should NEVER use any corrosive cleaner such as Javex or products containing corrosive ingredients. This could result in the finish wearing off in spots.
- First Choice Kitchens receives NO warranty from our supplier regarding the previously mentioned occurrences. Therefore, we cannot replace tops or offer credits to customers that have damage resulting from any of these issues.
- Your new countertop has a 1 year warranty on manufacturer defects. First Choice Kitchens examines all tops before they are installed, however if you notice any defects or have any concerns please contact us within 5 business days to have the top looked at.
